The Maximum wall exhaust traps

HOW IT WORKS

The Maximum Wall Exhaust Trap : Washroom, Dryer, HVAC and Hood Range.

Design : Engineered to protect the damper from direct contact of extreme weather.

Energy Savings : Unique air tight triple seal gasket.

Net Air Flow : Unique and specifically designed and engineered to permit for the exact net free air flow for both intake and exhaust, thus, eliminating back flow pressure.

Silent : Fine tune precision. The damper mechanism combined with the insulated damper, reduces noise level to a whisper.

Backdraft Proof : Unique anti gust deflector incorporated within the structural envelope.

Tail Pipe : A built-in 9 in. tail pipe (no need of extensions) eliminates moisture loss within the wall cavity and reduces lint build up at the joints.

Rodent Proof : Removable galvanized screen grill, combined with the metal structure, discourages nesting and all other destructible abuses.

Interchangeable : Two products in one, these wall vents can be transform from an exhaust to an air intake vent within minutes, thus, creating multiple uses, including air intake vents for air exchangers, wall mounted fresh air intake for attic air circulation.

Maintenance : Removable grill & damper allows cleaning of ducts all from outdoors.

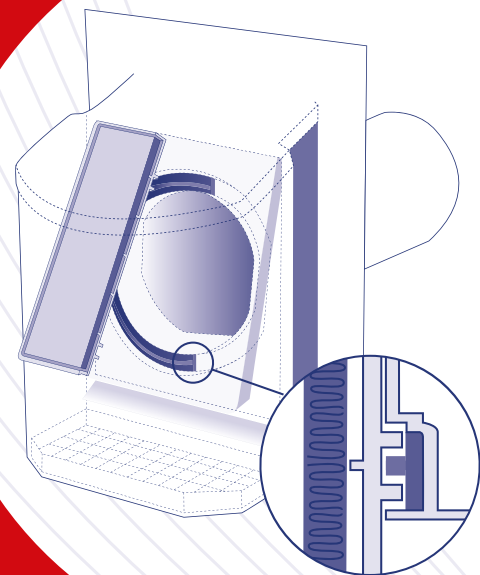

Finish : Highest quality powder coated paint finish with UV protection.

Available Colour : White (other colours available at a slight premium).

Dimensions : 3 , 4, 5, 6, & 3 ¼ x 10 in.

For special colours or dimensions please visit our web site :

WARNING : Clogged Dryer Ducts are one of the leading causes of residential fires. Periodic checks and or professional cleaning are highly recommended.

6 models for WALL EXHAUST TRAPS

With 6 models to choose from, these exhaust vents will give you peace of mind.

Model VMAX-AF3-BL

Description :
3 in. diameter wall mount exhaust vent with 9 in. tail pipe.

Model VMAX-AF5-BL

Description :
5 in. diameter wall mount exhaust vent with 9 in. tail pipe.

Model VMAX-AF4-BL

Description :
4 in. diameter wall mount exhaust vent with 9 in. tail pipe.

Model VMAX-AF6-BL

Description :
6 in. diameter wall mount exhaust vent with 9 in. tail pipe.

Model VMAX-AF4C-BL

Description :
4 in. outside diameter wall mount exhaust vent with 3 in. tail pipe.

Model VMAX-AF10-BL

Description :
3 ¼ in. X 10 in. rectangular wall mount exhaust vent with 9 in. tail pipe.

User Friendly : by removing the existing vent, this unit is designed to slide into the existing tail pipe within the wall cavity.

Features

The removable damper and grill allows you easy access for cleaning of the ducts, or simply transforming the vent to a fresh air intake vent for air exchanger units.
